Enrichment Activities

Here are some optional activities for family fun.
Check out the Eastpointe Community Schools website for even more!
https://bit.ly/ECSenrich

Dots and Boxes Game This is a fun game of logic and strategy for all ages. A dots and boxes game sheet is included in this packet so you can get started. You can even play outdoors with chalk; each player colors their box with a different color, making a cool design. Link to print more game sheets: https://bit.ly/dotbox2
Indoor Scavenger Hunt One is included in this packet. After finding the items, you can talk about why they were chosen. Encourage children to create their own scavenger hunts for other members of the family. This could also be fun with video family gatherings. See who can find the items first! Here's the link if you want to print another: https://bit.ly/EPhunt
Make a Paper Hovercraft Follow the enclosed directions to make your very own paper hovercraft. Have contests to see who can go fastest and farthest. Try using different kinds of paper (newspaper, wrapping paper, etc.) and see how that changes your results. Optional: use a ruler or tape measure and record the results. This website has more information: https://bit.ly/paperhover
Draw a Map Start with your room, and then map your house, or even your yard. Include a key for all of the symbols you use and a compass rose so people can find their way!
Go Noodle Take a brain break and have some fun! http://family.gonoodle.com
Learn about the Solar System http://planetsforkids.org
Take a virtual field trip to an egg farm https://bit.ly/eggtrip
